1 INTRODUCTION

The Property Control Plan defines the procedures to be used when handling any asset and the tracking of those assets for use within the Pacific JITC ITEC Program. This plan also defines the procedures to be used when handling and tracking any Government Furnished Equipment (GFE) assigned to and from the Pacific JITC ITEC. Ultimately it is the responsibility of everyone at the Pacific JITC ITEC to ensure proper asset management, but this document outlines two key persons and their responsibilities. Those persons are the Inventory Manager and the Data Center Manager/Lead Engineer.

2 ITEC INTERNAL ASSETS PROCEDURE

The new asset receipt procedure below defines the steps to be taken and thresholds for various action items. This procedure starts at the point in which assets are delivered to the Pacific JITC ITEC.

2.1 INITIAL ACCEPTANCE

Upon initial receipt of the asset from the shipper by the Inventory Manager (IM), incoming assets are to be placed in a designated area separate from any other asset storage. Items are to remain in this location until processed into the Pacific JITC ITEC inventory.

Once the assets are placed in the incoming storage location, the packing slip is to be reviewed against the purchase order provided by the purchasing contractor. The receiver will then scan the signed receipt and a list of the items received compared to the purchase order and email them to the purchasing contractor.

Upon completion of the receipt process, the IM will update the inventory tracking software with the status as received-processing. Once the item has been received and the inventory updated, the IM will notify the Government Representative (GR) which will normally be the ITEC's Contracting Office Representative (COR) that the items have been received. The COR from time to time will request a visual validation of items which may be completed via Skype, FaceTime, or any other video chat methods.

2.2 INVENTORY

Items that are being placed into inventory with a cost of \$100.00 or more are to be asset tagged using a Pacific JITC ITEC asset tag. Asset Tags 1-½ inches by ¾ inches. Placement of Asset Tags should never impair the functionality of the item being tagged (e.g. covering air vents or ports, etc.). Internal components of computing systems (e.g. Dual Inline Memory Modules (DIMMs) or expansion cards, etc.) should not be tagged. As well, asset tags should be placed in such a way so they are visible when the item is placed in a rack or other mounting position/device. If items that are subassemblies of an item collectively total \$100.00 or more, then the subassembly items that are less than \$100.00 are not tagged and the master item is tagged.

When tagging newly received items, the IM can either tag the item, or attach the asset tag to the item's box to be affixed to the item when unpacked. Once the items are tagged, the items need to be moved to the inventory storage area which is separate from the receiving area listed above.

Upon completion of the inventory process, the IM will update the inventory tracking software with the status as inventoried.

2.3 PLACEMENT

Once items are received, the Lead Engineer (LE) and/or Data Center Manager (DCM) are notified. Once the LE or DCM determines that they need the inventoried items, they will issue a request to the IM to fulfill the request and where to place the items for installation.

The LE or DCM will then unpack and install the item and notify the IM of the location. The IM will visually validate the placement of the item, the item's location, and that the asset tag has been properly affixed. The IM will then update the asset tracking software with the final location of the item.

2.4 MOVE

If the LE or DCM determines that an asset needs to be moved, they will notify the IM that installed inventory will be moved. The IM will acknowledge receipt of the notification. Upon receipt of the acknowledgement, the item will be moved to its new location and the IM notified of the completion of the move. Upon notification, the IM will visually verify the new location and will update the asset tracking software with the new location of the item.

2.5 RETIRE

At this time, this procedure is only documented up to the point of placement in a retirement area. Final disposition policy/process is still being determined.

When the LE or DCM determines that an item is to be retired and no longer placed in service, they will notify the IM with a request to retire an item. The IM will then submit a request to the GR to retire an item and will include a justification from LE or DCM as to why the item is to be retired and the operational status of the item (broken, functioning, etc.).

Upon approval from the GR to retire an item, the IM will notify the requestor of the approval. The requestor will then remove the item from service and place it in the retirement area. The IM will then be notified of the completed action and will visually validate that the item has been retired and placed in the retirement area.

Once the move has been visually validated, the IM will update the asset tracking software with the new location and change the item's status to retired. Once the item final disposition has been completed, the IM will update the asset tracking software with the appropriate status. (Disposed, donated, etc.)

3 GOVERNMENT FURNISHED EQUIPMENT POLICY AND PROCEDURE

It is the policy of the Pacific JITC that all equipment purchased under a contract let by the Pacific JITC and any equipment delivered as the result of a contract let by the Pacific JITC will be turned into the Pacific JITC at the completion of a project's period of performance (POP) and is considered government furnished equipment (GFE). Such equipment will be stored at the Pacific JITC ITEC and made available for other Pacific JITC projects to use during their POP.

All GFE items will be assigned a Property of U.S. Government asset tag and such asset tag will be recorded in the GFE asset tracking database. Any equipment that is part of a subassembly will be assigned an asset tag and such asset tag will be recorded in the GFE asset tracking database.

Pacific JITC projects that are in need of available GFE may request said GFE by submitting a Pacific JITC ITEC GFE Request form via the ITEC support request process. The list of available GFE will be made available on the Pacific JITC ITEC SharePoint site.

3.1 GFE DELIVERY REQUIREMENTS

All equipment is required to be presented to the Pacific JITC government representative or their assigned representative and the IM to be inspected, validated through a Pacific JITC ITEC GFE Return form, and recorded into the ITEC GFE Tracking Database.

3.2 GFE DELIVERY AND RECEIPT PROCESS

The following process outlines the initial delivery of Pacific JITC GFE by a project as part of their deliverable turn-over process at the end of the project's POP.

1. Prior to the delivery of the Pacific JITC GFE, a Pacific JITC ITEC GFE Return form will be populated by the IM which is to include all GFE asset tag numbers, part numbers, descriptions, serial numbers, and notes.
2. Delivery of Pacific JITC GFE will occur at the Pacific JITC ITEC as scheduled by the Pacific JITC ITEC. The project will present to the Pacific JITC ITEC team the equipment along with the signed GFE Return form as approved by the project's Contract Officer Representative (COR).
3. During the delivery of the GFE, the IM will record receipt of the equipment and will verify the model number, serial number, and description against the received items. During the verification process, the ITEC representative will photograph, or otherwise provide visual validation for the Pacific JITC COR of the received equipment.
4. Once every item is inspected and checked against the GFE Return form, the form will be signed by a Pacific JITC ITEC representative.
5. During the delivery of the GFE, a Property of U.S. Government asset tag will be assigned to any GFE not already assigned one.
6. Once the items have been inventoried and validated, the items will be placed in the Pacific JITC ITEC for safe storage until the GFE has been accepted by the government and recorded in the GFE Asset Database.

3.3 GFE GOVERNMENT ACCEPTANCE PROCESS

Once the Pacific JITC GFE receipt process listed above is complete, the following process will be used to process the government's acceptance of the GFE.

1. The IM will submit to Pacific JITC COR the inventory list and all supporting visual validation documentation/files for acceptance.
2. The Pacific JITC COR will process the request to accept the GFE and provide feedback via email or other record indicating the government's acceptance of the GFE.
3. The IM will record the acceptance by the government of the GFE.
4. The IM will enter into the Pacific JITC GFE Database all items accepted by the government and will report back to the Pacific JITC COR completion of the data entry.

3.4 GFE MANAGEMENT PROCESS

Every 12 months or less, unless requested by the Pacific JITC Leadership or the Pacific JITC COR, the IM and the DCM/LE will perform an audit and a visual validation of the items listed in the Pacific JITC GFE Database as being stored and managed by the Pacific JITC ITEC. The audit results will be reported back to the Pacific JITC Leadership and the Pacific JITC COR.

3.5 GFE PROJECT REASSIGNMENT PROCESS

The GFE stored and managed by the Pacific JITC ITEC is available for use by any of the Pacific JITC projects during their POP. The GFE may also be made available to other entities, including ITEC employees, at the discretion of the Pacific JITC Leadership. The following is the process to request and execute the reassignment of GFE to other projects or entities.

1. The requesting project or entity will submit an email request to support@pacificjitic.com, or the ITEC's Customer Project Coordinator, requesting the reassignment of the GFE to their project. The email request should include the approval of that project's COR.
2. The IM will populate a Pacific JITC ITEC GFE Request form with the requested GFE asset tag numbers, part numbers, descriptions, serial numbers, and notes. The IM will then send the form to the requesting project or entity to be signed.
3. The requesting project or entity will sign the GFE Request form and send it back to the IM.
4. The IM will forward the GFE Request form to the GR for signed approval.
5. The IM and DCM/LE will prepare the GFE for issuance and schedule a date in which the requesting party may pick up the GFE at the ITEC.
6. The GFE Request form receipt signature fields will be signed by the receiving party's authorized representative such as the Project Manager or Program Manager.
7. The Pacific JITC GFE Asset Database will be updated indicating the parties in which the GFE was reassigned to and the date of the reassignment.

3.6 ITEC INTERNAL GFE ASSIGNMENT

Some GFE stored and managed by the Pacific JITC ITEC is also available to any of the Pacific JITC ITEC staff members for use within the ITEC per government approval. The following is the process to request and execute the assignment of GFE to ITEC employees.

1. The ITEC employee will submit an email or verbal request to the IM requesting the assignment of the GFE to their work area.
2. The IM will populate a Pacific JITC ITEC – ITEC Internal GFE Request form with the requested GFE asset tag numbers, part numbers, descriptions, serial numbers, and notes, and send the form to the requesting ITEC employee to be signed.
3. The requesting ITEC employee will sign the ITEC Internal GFE Request form and send it back to the IM.
4. The IM will forward the ITEC Internal GFE Request form to the GR for signed approval.

5. The IM and DCM/LE will prepare the GFE for issuance.
6. The GFE Request form receipt signature fields will be signed by receiving parties.
7. The IM will update the Pacific JITC ITEC GFE Tracking Database indicating the parties in which the GFE was reassigned to and the date of the reassignment.

3.7 ITEC INTERNAL GFE RETURN

Upon the return of GFE from an ITEC employee back to the ITEC designated GFE storage area, the following process is to be executed.

1. The ITEC employee will submit an email or verbal request to the IM stating the GFE he or she would like to return to the ITEC designated GFE storage area.
2. The IM will populate a Pacific JITC ITEC – ITEC Internal GFE Return form with the returning GFE asset tag numbers, part numbers, descriptions, serial numbers, and notes, and send the form to the ITEC employee to be signed.
3. The ITEC employee will sign the ITEC Internal GFE Return form and send it back to the IM.
4. The IM will sign the ITEC Internal GFE Return form.
5. The IM and DCM/LE will return the GFE to the ITEC designated GFE storage area.
5. The IM will submit to Pacific JITC COR the inventory list and all supporting visual validation documentation/files for acceptance.
6. The Pacific JITC COR will process the request to accept the GFE and provide feedback via email or other record indicating the government's reacceptance of the GFE.
7. The IM will record the acceptance by the government of the GFE.
8. The IM will enter into the Pacific JITC GFE Database all items reaccepted by the government and will report back to the Pacific JITC COR completion of the data entry.

3.8 GFE INVENTORY DISPOSAL PROCESS

Final disposition policy/process is still being determined.

When the LE or DCM determines that an item is to be retired and no longer placed in service, they will notify the IM with a request to retire an item. The IM will then submit a request to the GR to retire an item and will include a justification from LE or DCM as to why the item is to be retired and the operational status of the item (broken, functioning, etc.).

Upon approval from the GR to retire an item, the IM will notify the requestor of the approval. The requestor will then remove the item from service and place it in the retirement area. The IM will then be notified of the completed action and will visually validate that the item has been retired and placed in the retirement area.

Once the move has been visually validated, the IM will update the asset tracking software with the new location and change the item's status to retired. Once the item final disposition has been completed, the IM will update the asset tracking software with the appropriate status. (Disposed, donated, etc.)

4 SCOPE AND APPENDICES

The scope of this process includes all inventoried and tracked assets within the Pacific JITC ITEC as well as all GFE assigned to and from the Pacific JITC ITEC.

- Appendix A—A list of Pacific JITC ITEC inventory current as of June 19, 2015
- Appendix B—A list of GFE assigned to and from the Pacific JITC ITEC current as of June 19, 2015
- Appendix C—Pacific JITC ITEC – GFE Request Form
- Appendix D—Pacific JITC ITEC – GFE Return Form
- Appendix E—Pacific JITC ITEC – ITEC Internal GFE Request Form
- Appendix F—Pacific JITC ITEC – ITEC Internal GFE Return Form

5 ROLES AND RESPONSIBILITIES

Inventory Manager – The Inventory Manager is responsible for the management and tracking of all of the assets within the Pacific JITC ITEC. This includes the management of the asset tracking software used to electronically manage and report on all assets within the Pacific JITC ITEC.

Data Center Manager (DCM)/Lead Engineer (LE) – The DCM/LE is responsible for the installation and management of the installation of the assets within the Pacific JITC ITEC. The DCM/LE is also responsible for ensuring that that IM is notified and aware of any asset changes.

APPENDIX A – PACIFIC JITC ITEC INVENTORY AS OF JUNE 19, 2015

APPENDIX C – PACIFIC JITC ITEC GFE REQUEST FORM

Integrated Test and Evaluation Center (ITEC)

Government Furnished Equipment Request

Releasing Entity

Entity POC _____ Entity COR _____

Receiving Entity

Company Name _____

Project Name _____

Project POC _____ Project COR _____

GFE Requirements

List requested GFE individually below.

Asset Tag	Part Number	Description	Serial Number	Notes

Signatures

Requestor _____ Title _____

Requestor Signature _____ Date _____

Requesting Entity COR _____

Requesting Entity COR Signature _____ Date _____

Received _____ Title _____

Received Signature _____ Date _____

APPENDIX D – PACIFIC JITC ITEC GFE RETURN FORM

Integrated Test and Evaluation Center (ITEC)

Government Furnished Equipment Return

Returning Entity

Company Name _____ Project Name _____

GFE Requirements

List returned GFE individually below.

Asset Tag	Part Number	Description	Serial Number	Notes

Signatures

Returned by _____ Title _____
 Signature _____ Date _____
 Pacific JITC ITEC Representative _____ Title _____
 Signature _____ Date _____
 Government Representative _____ Title _____
 Signature _____ Date _____

APPENDIX E – PACIFIC JITC ITEC – ITEC INTERNAL GFE REQUEST FORM

Integrated Test and Evaluation Center (ITEC)

ITEC Internal GFE Request

ITEC Internal GFE Requirements

Please list requested GFE individually below.

Asset Tag #	Part Number	Description	Serial Number	Notes

Requesting Entity

Requestor _____ Title _____

Requestor Signature _____ Date _____

Government Approval

Name _____ Title _____

Signature _____ Date _____

Receiving Entity

Received _____ Title _____

Received Signature _____ Date _____

APPENDIX F – PACIFIC JITC ITEC – ITEC INTERNAL GFE RETURN FORM

Integrated Test and Evaluation Center (ITEC)

ITEC Internal GFE Return

ITEC Internal GFE Requirements

Please list returned GFE individually below.

Asset Tag	Part Number	Description	Serial #	Notes

Signatures

Returned by _____ Title _____

Signature _____ Date _____

Government Representative _____ Title _____
